

Xsigo Education Course Description

Title: Xsigo Virtual I/O Administration

Description:

This course teaches the fundamentals of Xsigo Systems products and solutions. Students gain knowledge to successfully describe, install, configure, monitor, and maintain Xsigo virtualization solutions. Students will receive classroom training and hands-on experience with all hardware and management components including the Xsigo I/O Director, Xsigo Management System GUI and host servers using virtual I/O devices.

Duration: 3 days

Instructional Goals:

After completing this training you will be able to:

- Describe the concept of I/O virtualization
- Describe the features, components, and architecture of the Xsigo I/O Director
- Install and configure the Xsigo I/O Director
- Configure host server hardware and drivers
- Monitor and maintain the Xsigo I/O Director
- Upgrade the Xsigo I/O Director and host server firmware/software

Target Audience:

This course is designed for administrators responsible for installing, configuring and maintaining the Xsigo I/O Director, including system, storage and/or network administrators.

Prerequisites:

The following knowledge is required to be successful in this training:

- Experience with Windows and/or Linux system and network administration tasks
- Experience with basic SAN and storage administration tasks

Price: \$1995 USD
